What if people could time travel?

The world would be a different place if everyone could time travel. Instead of having others explain to you the amazing artifacts, people can find out themselves! For example, if everyone wanted to find out how life was like in the Victorian times, it could be great for many people as it's entertaining trying out old treasured items that we probably wouldn't have now. All people have to do is just go back in time. Not only would you get to see the past and future, fixing regrets and mistakes would also be extremely useful. Although this may be fantastic for most people, many people (particularly tour guides) could lose their jobs especially if they're passionate about it.
